The purpose of this research study was to quantitatively measure the effectiveness of same-gender schools on middle school students' mathematics and reading achievement for 1 metropolitan school system located in the State of Georgia. This study examined the aggregate Criterion-Referenced Competency Test (CRCT) reading and mathematics performance of 6th- and 7th-grade students who either attended 1 of 2 same-gender schools or 1 of 3 coeducational schools. This study employed a quasi-experimental (interrupted time-series) research design using a z-test. Two research questions addressed in this study were (a) Will a comparison of the CRCT reading and mathematics scores of the district's middle school students (i.e., Grades 6 and 7) evidence a statistically significant difference between the scores of students who attended a same-gender school and those students who did not attend a same-gender school? and (b) Will a comparison of the yearly CRCT reading and mathematics scores of the district's middle school students (i.e., Grades 6 through 7) who attended same-gender schools evidence a statistically significant difference from the inception of the program in 2007 through 2009? The findings of this study indicate a positive correlation between the use of same-gender educational structures and student achievement in reading and math scores on the CRCT. The results of the study indicate the need for further research and educational practices to contribute to the limited body of knowledge on closing the achievement gap in middle school education

Provides a body of research literature that contributes to the base of organizational theory upon which library administrators rely. This title covers a variety of topics relating to the management of academic, and public and school libraries.

See America with 50 of Our Finest, Funniest, and Foremost Writers Anthony Bourdain chases the fumigation truck in Bergen County, New Jersey Dave Eggers tells it straight: Illinois is Number 1 Louise Erdrich loses her bikini top in North Dakota Jonathan Franzen gets waylaid by New York's publicist...and personal attorney...and historian...and geologist John Hodgman explains why there is no such thing as a "Massachusettsan" Edward P. Improvise compasses and quadrants to track the sun and moon across a graph paper sky. Cover a tennis ball in a beautiful earth wrapper, then tilt it towards a tennis-ball sun to comprehend seasons. Wrap a Ping-Pong ball halfway in black tape to model moon phases that wax and wane. Fathom heavenly motions indoors and out!

"This resource supports new and experienced educators who want to prepare for and design purposeful number talks for their students; the author demonstrates how to develop grade-level-specific strategies for addition, subtraction, multiplication, and division. Includes connections to national standards, a DVD, reproducibles, bibliography, and index"--Provided by publisher.

This study examines the relationship between delivery models (the class size reduction model and the sheltered instruction model) and language development levels on the grade-level reading development of sixth-grade English learners (ELs) attending public middle schools in metro Atlanta, Georgia. The instrument used to measure grade-level mastery of reading standards and development is Georgia's sixth-grade Criterion-Referenced Competency Test (CRCT). Language development levels are measured and provided by the Assessing Comprehension and Communication in English State-to-State (ACCESS) test. Criterion sampling and convenience sampling are the means by which ELs are selected. A causal-comparative design was implemented for both research questions. Interaction effects were identified between independent variables of delivery models and language development levels. Main effects between each independent variable and the dependent variable were analyzed for statistically significant differences. Data analysis consisted of a two-way ANOVA, followed by normality and assumption testing. Descriptive data, including demographic and linguistic data, was discussed as well.

Introduces unique natural formations in the United States, including the Great Lakes, the Colorado Plateau, and the Missouri River.
