The P0440 code means that the control module has detected a leak in the Evaporative Emission (EVAP). Loose fuel tank filler cap is the most common cause that triggers the P0440 code. There is a factory service bulletin for the following Toyota models: 2003–2004 Toyota Corolla

P0440 TOYOTA - Engine Codes.com

The P0440 code means that the control module has detected a leak in the Evaporative Emission (EVAP). Loose fuel tank filler cap is the most common cause that triggers the P0440 code. There is a factory service bulletin for the following Toyota models: 2003–2004 Toyota Corolla

P0440 Toyota - OBDII Codes Engine Light Definitions ...

OBD-II code P0440 represents a general fault in the Evaporative Emission Control (EVAP) System. Basically, this code means that something in the EVAP system is broken. Another code will typically accompany P0440, often in the P044X chain (where "X" represents any number). The EVAP system is responsible for controlling the fuel vapors in your Toyota's gas tank.

P0440 Code - Toyota - Toyota Parts Center

When the ECU registers that there is a problem with the EVAP system it will throw the P0440 OBDII Code. Toyota Tacoma P0440 OBDII Code Symptoms The check engine light is often the only sign P0440 code has been triggered. P0440 code will typically not be accompanied by any noticeable symptoms other than the smell of gas and the service engine soon light. Fuel economy may suffer.

Toyota Tacoma P0440: Evaporative Emission Control System ...

P0440 is an OBD-II generic code that the engine control module (ECM) has detected a leak in the fuel tank vapor system or a vapor pressure sensor has malfunctioned. What causes the P0440 code? The ECM has closed off all of the fuel tank vapor lines and monitors the vapor pressure and sees a pressure drop more than is allowed within the test parameters of the ECM.

P0440 OBD-II Trouble Code: Evaporative Emission Control ...

This system typically does not require maintenance, yet faults may take place with Check Engine lighting that prevents the car from passing the OBD II plug in emission testing. The most typical fault code associated with EVAP is the P0440, which may indicate a significant leak that is usually a loose-fitting gas cap.

Error Code P0440: Evaporative Emission Control System ...

Things to check first if you are getting P0440, P0441, P0442, P0446 1) Make sure the gas cap is ON (and "clicks") and is the correct Toyota Gas Cap (aftermarket may not work). Clear the codes and run for a while. See if codes come back.
