The sixth edition of Financial Management provides students with an overview of financial management suited to the first course in finance. The focus of the text is on the big picture, providing an introduction to financial decision making grounded in current financial theory and the current state of world economic conditions. Attention is paid to both valuation and capital markets, as well as their influence on corporate financial decisions. The 10 basic principles of finance are introduced in the first chapter and woven throughout the text, to give students a solid foundation from which to build their knowledge of finance. The goal of this text is to go beyond teaching the tools of a discipline or a trade and help students gain a complete understanding of the subject. This will give them the ability to apply what they have learnt to new and as yet unforeseen problems—in short, to educate students in finance.

Financial Management is a total learning package that reflects the vitality of an ever-expanding discipline, building on the foundations of economics and accounting. Adapted for the Australian market, students are presented with a cohesive, inter-related subject that they can use when approaching future, as yet unknown, problems. Building on the strengths of the previous edition, the Eighth Edition sees consolidation and refining of content, creating a modern teaching approach. Considering student's engagement, the text is arranged around five key principles to enhance focus on the intuition behind the mechanics of solving financial problems. These principles are woven throughout the book, forming a rationalised, coherent, integrated and intuitive problem-solving approach. Additionally, this product Has respected and updated/current content delivered in a range of customisable formats and affordable price points. Can be used in both majors and non-majors across Finance, in Second Year undergraduate courses in Business Finance, Financial Management and Finance and Investment.
