Diesel Engine Repairs for the Marine and Power Generation industries. The Metalock Engineering Group have carried out successful diesel engine reconditioning and repair for over 70 years on all types of engines. Endless running times to meet the ever-increasing demands for power means that engine availability is a critical requirement, however, there are times when things don't always go to plan and even the best-maintained engines can break down and it is always at the most inconvenient time.

One thing you can do to repair an outboard motor that is suffering from several symptoms such as sputtering, hesitation at startup or the inability to start is to add fuel treatments. The most common is an ethanol treatment, which contains a chemical that offsets the condensation and water problems ethanol can cause in a marine engine that affect the performance of its parts.
