From gaming consoles to smartphones, video games are everywhere today, including those set in historical times and particularly in the ancient world. This volume explores the varied depictions of the ancient world in video games and demonstrates the potential challenges of games for scholars as well as the applications of game engines for educational and academic purposes. With successful series such as "Assassin's Creed" or "Civilization" selling millions of copies, video games rival even television and cinema in their role in shaping younger audiences' perceptions of the past. Yet classical scholarship, though embracing other popular media as areas of research, has so far largely ignored video games as a vehicle of classical reception. This collection of essays fills this gap with a dedicated study of receptions, remediations and representations of Classical Antiquity across all electronic gaming platforms and genres. It presents cutting-edge research in classics and classical receptions, game studies and archaeogaming, adopting different perspectives and combining papers from scholars, gamers, game developers and historical consultants. In doing so, it delivers the first state-of-the-art account of both the wide array of 'ancient' video games, as well as the challenges and rewards of this new and exciting field.

A sweeping and lively history of one of the most dramatic stories never told—of the greatest railroad war of all time, fought by the daring leaders of the Santa Fe and the Rio Grande to seize, control, and create the American West. It is difficult to imagine now, but for all of its cloudy peaks and gorgeous coastline, the American West might have been barren tundra as far as most Americans knew well into the 19th century. While gauzy advertising promotions of the West as a paradise on earth intrigued citizens in the East and Midwest, many believed the journey too hazardous to be worthwhile—until 1869, when the first transcontinental railroad changed the face of transportation. Railroad companies soon became the rulers of western expansion, choosing routes, creating brand-new railroad towns, and building up remote settlements like Santa Fe, Albuquerque, San Diego, and El Paso into proper cities. But thinning federal grants left the routes incomplete, an opportunity that two brash new railroad men, armed with private investments and determination to build an empire across the Southwest clear to the Pacific, soon seized, leading to the greatest railroad war in American history. In *From the River to the Sea*, bestselling author John Sedgwick recounts, in vivid and thrilling detail, the decade-long fight between General William J. Palmer, the Civil War hero leading the “little family” of his Rio Grande, coming down from Denver, hoping to showcase the majesty of the Rockies, and William Barstow Strong, the hard-nosed manager of the corporate-minded Santa Fe, venturing west from Kansas. What begins as an accidental rivalry when the two lines cross in Colorado soon evolves into an all-out battle as each man tries to outdo the other—claiming exclusive routes through mountains, narrow passes, and the richest silver mines in the world; enlisting private armies to protect their land and lawyers to find loopholes; dispatching spies to gain information; and even using the power of the press and incurring the wrath of the God-like Robber Baron Jay Gould—to emerge victorious. By the end of the century, one man will fade into anonymity and disgrace. The other will achieve unparalleled success—and in the process, transform a sleepy backwater of thirty thousand called “Los Angeles” into a booming metropolis that will forever change the United States. Filled with colorful characters and high drama, told at the speed of a locomotive, *From the River to the Sea* is an unforgettable piece of American history—and one of the last great untold tales of the

Wild West.

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

#1 NEW YORK TIMES AND WALL STREET JOURNAL BESTSELLER Pay brand-new employees \$2,000 to quit Make customer service the responsibility of the entire company-not just a department Focus on company culture as the #1 priority Apply research from the science of happiness to running a business Help employees grow-both personally and professionally Seek to change the world Oh, and make money too . . . Sound crazy? It's all standard operating procedure at Zappos, the online retailer that's doing over \$1 billion in gross merchandise sales annually. After debuting as the highest-ranking newcomer in Fortune magazine's annual "Best Companies to Work For" list in 2009, Zappos was acquired by Amazon in a deal valued at over \$1.2 billion on the day of closing. In DELIVERING HAPPINESS, Zappos CEO Tony Hsieh shares the different lessons he has learned in business and life, from starting a worm farm to running a pizza business, through LinkExchange, Zappos, and more. Fast-paced and down-to-earth, DELIVERING HAPPINESS shows how a very different kind of corporate culture is a powerful model for achieving success-and how by concentrating on the happiness of those around you, you can dramatically increase your own. A mysterious woman stands and smiles at Monroe Stahr, the last of the great Hollywood princes. Enchanted by one another, they begin a passionate but hopeless love affair.

The New York Times bestselling and critically acclaimed memoir from cultural icon and culinary standard bearer Alice Waters recalls the circuitous road and tumultuous times leading to the opening of what is arguably America's most influential restaurant. When Alice Waters opened the doors of her "little French restaurant" in Berkeley, California in 1971 at the age of 27, no one ever anticipated the indelible mark it would leave on the culinary landscape—Alice least of all. Fueled in equal parts by naiveté and a relentless pursuit of beauty and pure flavor, she turned her passion project into an iconic institution that redefined American cuisine for generations of chefs and food lovers. In *Coming to My Senses* Alice retraces the events that led her to 1517 Shattuck Avenue and the tumultuous times that emboldened her to find her own voice as a cook when the prevailing food culture was embracing convenience and uniformity. Moving from a repressive suburban upbringing to Berkeley in 1964 at the height of the Free Speech Movement and campus unrest, she was drawn into a bohemian circle of charismatic figures whose views on design, politics, film, and food would ultimately inform the unique culture on which *Chez Panisse* was founded. Dotted with stories, recipes, photographs, and letters, *Coming to My Senses* is at once deeply personal and modestly understated, a quietly revealing look at one woman's evolution from a rebellious yet impressionable follower to a respected activist who effects

social and political change on a global level through the common bond of food.

From Pulitzer Prize-winning journalist and culture critic Christina Binkley comes an updated edition of her New York Times bestselling account of sex, drugs, and the rise of Las Vegas. With a new prologue on the rise and fall of Steve Wynn. The Strip. Home to some of the world's grandest, flashiest, and most lucrative casino resorts, Las Vegas, with its multitude of attractions, draws millions of tourists from around the world every year. But Sin City hasn't always been booming: modern Vegas exists largely thanks to the extraordinary vision, and remarkable hubris, of three competing business moguls: Kirk Kerkorian, Dr. Gary Loveman, and Steve Wynn. And in the wake of #MeToo revelations, not all empires survive. Having had personal access to all three tycoons, Binkley explains how their audacious efforts to reach the top-and to top one another-shaped the city as it stands. She takes us inside their grandest schemes, their riskiest deals, and the personalities that drove them to their greatest successes, and their most painful defeats. In this updated edition, she reveals the inside story of how Steve Wynn, the winner who took all, ultimately lost everything-twice. Sharp, insightful, and revealing, Winner Takes All is the gripping story of how billions of dollars and the unparalleled drive for power turned dreams into larger-than-life reality. "It's a great drama on the greatest stage. . . Wynn, Kerkorian, and Loveman represent three opposing business personalities, three styles of achieving success. On the Vegas Strip, they're pitted against one another like gladiators, and we've got front-row seats. Kapow!" - bestselling author Po Bronson

President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer, Steven VanRoekel, said that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Facebook as a nation in 2012 would be the third largest country in the world with over 900 million citizens, after China and India. This book portrays the social media ecosystem as a world of increasing Total Information Awareness, which is essentially a civilian version of the controversial Total Information Awareness program unveiled in 2002 by the Defense Advanced Research Projects Agency (DARPA) at the U.S. Department of Defense. Back in the 60's, DARPA initiated and funded the research and development of Advanced Research Projects Agency Network (ARPANET) that went online in 1969. The success of ARPANET gave rise to the global commercial Internet in the 90's and the new generation of Fortune 500 companies today including Amazon.com, Google, eBay, and Yahoo!. As if life comes full circle in the 21st century, private businesses and the ubiquity of social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies and infrastructures necessary for the DARPA-proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook "the most appalling spying machine that has ever been invented." Indeed, military and civilian technologies have interwoven into every fabric of our society, as Facebook co-founder and CEO Mark Zuckerberg said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation, and Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller-coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA/PIPA blackout, cyber bullying, crime fighting, and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers, and academic scholars in the Program in Science, Technology, and Society (STS) will find this book a valuable asset.
