This book offers a user-friendly guide to preparing a perfect dissertation. Rather than focusing only on how to draft the report itself, the authors provide readers with material on generating a researchable question, as well as methods for assessing blind spots and learning styles that may get in the way of completing a dissertation. Using examples from a wide variety of disciplines, the authors demonstrate how to write up results, develop appropriate writing skills, and ways to construct tables and figures. In addition, the book includes information on writing up qualitative research, using computer technology effectively to assist in the dissertation process and following ethical guidelines in conducting research.

SAGE Course Companions are an exciting new series from SAGE offering students an insider’s guide into how to make the most of their undergraduate courses and extend their understanding of key concepts covered in their course. Social Research Methods provides student readers with essential help with their research project, with revising for their course exams, preparing and writing course assessment materials, and enhancing and progressing their knowledge and thinking skills in line with course requirements on Research Methods courses. This Course Companion is designed to augment, rather than replace, existing textbooks for the course, and will provide: " Helpful summaries of the course curriculum to aid essay and project planning " Key summaries of the approach taken by the main Methods textbooks " Guidance on the essential study skills required " Help with developing critical thinking " Route-maps to aid the development of wider learning above and beyond the textbook " Pointers to success in course exams and written assessment exercises " A tutor’s-eye view of what course examiners are looking for " An insider’s view of what key course concepts are really all about SAGE Course Companions are much more than revision guides for undergraduate; they are an essential tool to taking your course learning and understanding to new levels and in new directions that are the key to success in undergraduate courses.

This step-by-step guide begins by identifying and defining the basics of a dissertation proposal. With careful consideration, they explore proposal functions and parts, show how to build your study’s chain of reasoning, and carefully review alternate study designs. Chapters are devoted to qualitative studies (sectioned into case studies, philosophical, and historical investigations); quantitative studies (sectioned into experimental, causal modeling, and meta-analysis studies), and mixed-method studies (sectioned into: sample survey, evaluation, development, and demonstration and action projects). Three extensively annotated proposals of former students provide examples of the guidance offered and illustrate common types of studies.

Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader’s Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader’s Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

How to Write about Economics and Public Policy is designed to guide graduate students through conducting, and writing about, research on a wide range of topics in public policy and economics. This guidance is based upon the actual writing practices of professional researchers in these fields and it will appeal to practitioners and students in disciplinary areas such as international economics, macroeconomics, development economics, public finance, policy studies, policy analysis, and public administration. Supported by real examples from professional and student writers, the book helps students understand what is expected of writers in their field and guides them through choosing a topic for research to writing each section of the paper. This book would be equally effective as a classroom text or a self-study resource. Teaches students how to write about qualitative and quantitative research in public policy and economics in a way that is suitable for academic consumption and that can drive public policy debates Uses the genre-based approach to writing to teach discipline-appropriate ways of framing problems, designing studies, and writing and structuring content Includes authentic examples written by students and international researchers from various sub-disciplines of economics and public policy Contains strategies and suggestions for textual analysis of research samples to give students an opportunity to practice key points explained in the book Is based on a comprehensive analysis of a research corpus containing 400+ research articles in various areas of public policy and economics

Addressing one of the key challenges facing doctoral students, Completing Your Qualitative Dissertation by Linda Dale Bloomberg and Marie Volpe fills a gap in qualitative literature by offering comprehensive guidance and practical tools for navigating each step in the qualitative dissertation journey, including the planning, research, and writing phases. Blending the conceptual, theoretical, and practical, the book becomes a dissertation in action—a logical and cohesive explanation and illustration of content and process. The Third Edition maintains key features that distinguish its unique approach and has been thoroughly updated and expanded throughout to reflect and address recent developments in the field.

A research proposal is a plan that a candidate submits to gain approval for post-graduate research. Although it is a typical requirement for any research in higher education, it has failed to receive the attention it deserves from the academic community as a procedure of systematic teaching and learning. This book provides a support framework with step-by-step guidance about what constitutes a good research proposal and what can be done to maximize one’s chances of writing a successful application. It also presents advice and practical activities to enhance skill development, and shows how success is within reach if we are willing to face our flaws and grasp how to use the available information productively and persuasively.

The SAGE Guide to Writing in Criminal Justice Research Methods equips students with transferable writing skills that can be applied across the field of criminal justice—both academically and professionally. Authors Jennifer M. Allen and Steven Houglund interweave professional and applied writing, academic writing, and information literacy, with the result being a stronger, more confident writer, researcher, and student in criminal justice. Focused on teaching students how to write in the academic setting while introducing them to a number of other writing tools specific to research methods, such as writing literature reviews, abstracts, proposals, and more. The perfect companion for any criminal justice research methods course, this brief text focuses on key topics that will benefit students in their classes and in the field.

Ideal for instructors and students in a wide range of sociological courses, this guide makes the case that thinking and writing are integrally related and that writing, therefore, exercises the sociological imagination. Written in a clear and conversational style, A Guide to Writing Sociology Papers examines a wide range of writing assignments for sociology courses at all levels of the curriculum. Employing a variety of writing samples as a means to illustrate effective writing, this brief and inexpensive text teaches students how to deftly research and write about sociology.

Now in a thoroughly revised and refreshed fourth edition, Research Methods in Public Administration and Nonprofit Management is beloved by students and professors alike for its exceptional clarity and accessibility and plentiful illustrations. This new edition integrates quantitative, qualitative, and mixed-methods approaches, as well as specific up-to-date instruction in the use of statistical software programs such as Excel and SPSS. Changes to this edition include: A new section, featuring two new chapters, to explore mixed-methods approaches to research, including fundamentals, research design, data collection, and analyzing and interpreting findings A new, dedicated chapter on Big Data research Updated exhibits and examples throughout the book A new companion website to accompany the book containing PowerPoint slides for each chapter New exhibits, tables, figures, and exercises, as well as key terms and discussion questions at the end of each chapter Research Methods in Public Administration and Nonprofit Management, 4e is an ideal textbook for use in all research methods courses in undergraduate and graduate public administration, public affairs, and nonprofit management courses.
