Original.

With U.S. intelligence agencies wracked by internal power struggles and paralyzed by bureaucracy, the president has been forced to establish his own clandestine group--Covert-One. It's activated only as a last resort, when the threat is on a global scale and time is running out. THE UTOPIA EXPERIMENT When Dresner Industries unveils the Merge, a device that is destined to revolutionize the world and make the personal computer and smartphone obsolete, Covert-One operative Colonel Jon Smith is assigned to assess its military potential. He discovers that enhanced vision, real-time battlefield displays, unbreakable security, and near-perfect marksmanship are only the beginning of a technology that will change the face of warfare forever--and one that must be kept out of the hands of America's enemies at all costs. Meanwhile, in the mountains of Afghanistan, CIA operative Randi Russell encounters an entire village of murdered Afghans--all equipped with enhanced Merge technology that even the Agency didn't know existed. As Smith and Russell delve into the circumstances surrounding the Afghans' deaths, they're quickly blocked by someone who seems to have access to the highest levels of the military--a person that even the president knows nothing about. Is the Merge really as secure as its creator claims? And what secrets about its development is the Pentagon so desperate to hide? Smith and Russell are determined to learn the truth. But they may pay for it with their lives. . . .

From the author of The Real History Behind the Templars--the origins and stories behind end-of-the-world predictions throughout history, from Revelations to 2012. In entertaining and sharp prose, historian Sharan Newman explores theories of world destruction from ancient times up to the present day, theories which reveal as much about human nature as they do about the predominant historical, scientific, and religious beliefs of the time. Readers will find answers to the following end-of-times questions: ?Did the Mayans really say the world will end in December 2012? ?How have the signs in the New Testament Book of Revelations been interpreted over the years? ?How did ancient Egyptians, Norse, and Chinese think the world would end? ?When did Nostradamus predict that the last days would come? ?Does the I Ching reference 2012? ?Why didn't the world end in Y2K? ?Are meteors, global warming, super-volcanoes, and the threat of nuclear war signs that the end is near?

Many teachers are trained to approach their work with a set of teaching strategies and lessons that changes little over time. Because they are focused on how they teach, rather than on how their students learn, they use the same techniques day after day, making no adjustments for students' different learning needs. In Learning-Driven Schools: A Practical Guide for Teachers and Principals, Barry Beers shows how teachers can plan, teach, and assess for student learning--and how principals can support teachers in their efforts. The book includes \* An overview of the research on knowledge retention; \* Real-life samples of lesson plans that address state and local standards; \* Strategies on accurately assessing student learning; \* Advice for teachers on addressing the needs of struggling, intermediate, and advanced students at the same time; and \* Advice for administrators on conducting effective classroom observations. A rallying cry and how-to guide rolled into one, this book is an invaluable resource for anyone passionate about learning. Having served as a veteran teacher and principal himself, Barry Beers brings his own experience and understanding to bear on the essential task of ensuring that student learning remains the clear focus of our schools.

Get the hands-on experience you need to program for the iPhone and iPod Touch. With this easy-to-follow guide, you'll build several sample applications by learning how to use Xcode tools, the Objective-C programming language, and the core frameworks. Before you know it, you'll not only have the skills to develop your own apps, you'll know how to sail through the process of submitting apps to the iTunes App Store. Whether you're a developer new to Mac programming or an experienced Mac developer ready to tackle the iPhone and iPod Touch, Learning iPhone Programming will give you a head start on building market-ready iPhone apps. Start using Xcode right away, and learn how to work with Interface Builder Take advantage of model-view-controller (MVC) architecture with Objective-C Build a data-entry interface, and learn how to parse and store the data you receive Solve typical problems while building a variety of challenging sample apps Understand the demands and details of App Store and ad hoc distribution Use iPhone's accelerometer, proximity sensor, GPS, digital compass, and camera Integrate your app with iPhone's preference pane, media playback, and more

Health professionals and students need look no further than the seventh edition of Leitman's Manual for Eye Examination and Diagnosis for a concise introduction to eye diagnosis and treatment. Designed to be read cover-to-cover, this short, well illustrated text summarizes key points needed for understanding basic examination techniques, use of instruments and major ophthalmic disorders. It provides a strong foundation of knowledge on which to grow and enjoy this ever-changing speciality. Manual for Eye Examination and Diagnosis is the only complete overview of eyecare available in such an easy-to-read format, and features: Over 360 full-color illustrations and clinical photographs Coverage of the fundamentals with practical, clinical points Updated information on refractive surgery, glaucoma surgery and neuro-ophthalmology Latest information on tests such as OCT and optic nerve fiber scanning.

KX125 (1982-1991), KX250 (1982-1991), KX500 (1983-2004)

"Slavery and intemperance: the two evils of this country."From an early age, Catherine Lawrence devoted her life to the relief of the suffering of others. Like many strong women of her time, she eventually embraced abolition, the temperance movement, and women's suffrage A deeply religious woman, she felt a calling to help others. During the American Civil War, she worked as a nurse to wounded and dying soldiers.
