The Complete Business Process Handbook is the most comprehensive body of knowledge on business processes with revealing new research. Written as a practical guide for Executives, Practitioners, Managers and Students by the authorities that have shaped the way we think and work with process today. It stands out as a masterpiece, being part of the BPM bachelor and master degree curriculum at universities around the world, with revealing academic research and insight from the leaders in the market. This book provides everything you need to know about the processes and frameworks, methods, and approaches to implement BPM. Through real-world examples, best practices, LEADing practices and advice from experts, readers will understand how BPM works and how to best use it to their advantage. Cases from industry leaders and innovators show how early adopters of LEADing Practices improved their businesses by using BPM technology and methodology. As the first of three volumes, this book represents the most comprehensive body of knowledge published on business process. Following closely behind, the second volume uniquely bridges theory with how BPM is applied today with the most extensive information on extended BPM. The third volume will explore award winning real-life examples of leading business process practices and how it can be replaced to your advantage. Learn what Business Process is and how to get started Comprehensive historical process evolution In-depth look at the Process Anatomy, Semantics and Ontology Find out how to link Strategy to Operation with value driven BPM Uncover how to establish a way of Thinking, Working, Modelling and Implementation Explore comprehensive Frameworks, Methods and Approaches How to build BPM competencies and establish a Center of Excellence Discover how to apply Social BPM, Sustainable and Evidence based BPM Learn how Value & Performance Measurement and Management Learn how to roll-out and deploy process Explore how to enable Process Owners, Roles and Knowledge Workers Discover how to Process and Application Modelling Uncover Process Lifecycle, Maturity, Alignment and Continuous Improvement Practical continuous improvement with the way of Governance Future BPM trends that will affect business Explore the BPM Body of Knowledge

This book constitutes the refereed proceedings of two joint events - the International Workshop on Software Measurement, IWSM 2009 and the International Conference on Software Process and Product Measurement, Mensura 2009, held in Amsterdam, The Netherlands, in November 2009. The 24 revised full papers presented were carefully reviewed and selected from numerous submissions for inclusion in the book. This book considers issues such as the applicability of measures and metrics to software, the efficiency of measurement programs in industry and the theoretical foundations of software engineering.

What are the challenges and needs of society that schools face? This publication focuses on the transformation of the school towards a learning organization in the society. The authors present the model of school transformation, supporting it with the theory of transformational leadership and a description of contemporary school functions in the individual and social dimensions. The main reflection is grounded in the assumption that an institution where the interactions between the present and the image of the future are particularly visible is school-essentially focused on the anticipation of emerging civilization trends and new opportunities. Modern schools are particularly expected to promote functions related to the preparation for active life, involved in creating the world in changing conditions and functions related to the universalization of life patterns while maintaining the identity and subjectivity of groups and individuals.

This volume constitutes the refereed proceedings of the 27th European Conference on Systems, Software and Services Process Improvement, EuroSPI conference, held in Düsseldorf, Germany, in September 2020*. The 50 full papers and 13 short papers presented were carefully reviewed and selected from 100 submissions. They are organized in topical sections on ?visionary papers, SPI manifesto and improvement strategies, SPI and emerging software and systems engineering paradigms, SPI and standards and safety and security norms, SPI and team performance & agile & innovation, SPI and agile, emerging software engineering paradigms, digitalisation of industry, infrastructure and e-mobility, good and bad practices in improvement, functional safety and cybersecurity, experiences with agile and lean, standards and assessment models, recent innovations, virtual reality. *The conference was partially held virtually due to the COVID-19 pandemic.

In this book, innovations in the education system are discussed and exemplary developments and projects from Finland and Germany are compared. On the one hand, the focus is on current research results, while on the other hand, examples of good practice from both countries describe remarkable ways of implementation and provide creative suggestions for one's own educational work. These are based on the experience of ten years of international cooperation between two teacher-training university locations.

Organization is excellent....Each of the chapters is well written and is comprehensive on a given topic....Overall Facial Nerve Disorders and Diseases: Diagnosis and Management is a very well done text that lives up to its title. -- Otology & Neurotology ...one cannot do better than this, if seeking an all-encompassing textbook on pathology, diagnosis, and management of facial nerve disorders. -- The Journal of Laryngology & Otology This authoritative and up-to-date reference is a complete guide to the basic science, diagnosis, testing, and treatment of facial nerve disorders and diseases. An international team of renowned experts, put together and headed by the book's two specialist editors, provide in-depth discussion of facial nerve topography and physiology, as well as the broad spectrum of infectious, inflammatory, acute, chronic, benign, and malignant diseases related to facial nerve dysfunction. The book is filled with practical evidence-based information, guidelines, and algorithms presented in uniformly structured chapters, allowing readers to quickly pinpoint key details for treating a specific disease or disorder. Special Features: Pertinent topics including facial nerve trauma, Lyme disease, postoperative facial nerve palsy, face transplant, adjuvant treatment with botulinum toxin and fillers, facial dystonia and facial spasms, and the psychological and medicolegal aspects of facial nerve care are covered Step-by-step descriptions provided for facial nerve repair and reconstruction, static and dynamic reanimation techniques for adults and children, evaluation and treatment of paralytic eyelids, and more A wealth of clinically relevant information, including tips and tricks, and pitfalls to avoid in everyday practice More than 260 images and 16 videos (accessed through the Thieme MediaCenter) help visualizing and comprehending the content Extensive reference lists at the end of each chapter offer an overview of scientific work on the topic With current perspectives from leading experts, valuable clinical tools and advice, and coherently organized chapters, Facial Nerve Disorders and Diseases: Diagnosis and Management is a single-volume source for the state-of-the-art in facial nerve care. Specialists and residents in otorhinolaryngology, maxillofacial surgery, plastic surgery, neurosurgery, neurology, and rehabilitation medicine will refer to the book time and again in their treatment of patients with facial nerve dysfunction.

Business Process Management (BPM) has become one of the most widely used approaches for the design of modern organizational and information systems. The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities. This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders. This second volume focuses on the managerial and organizational challenges of BPM such as strategic and cultural alignment, governance and the education of BPM stakeholders. As such, this book provides concepts and methodologies for the integration of BPM. Each chapter has been contributed by leading international experts. Selected case studies complement their views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM. The second edition of this handbook has been significantly revised and extended. Each chapter has been updated to reflect the most current developments. This includes in particular new technologies such as in-memory data and process management, social media and networks. A further focus of this revised and extended edition is on the actual deployment of the proposed theoretical concepts. This volume includes a number of entire new chapters from some of the world's leading experts in the domain of BPM.
