United States Army

USB flash drives, also called jump drives or thumb drives, have become common devices in most organizations because they are useful devices that pose NO risk as a source of data leakage. False USB drives and other removable, portable media devices are mostly self starting and may bypass firewalls, virus scans, password protection, and other measures, when plugged in.

Thumb Drive Awareness - partsstop.com

A Good Samaritan hoping to return the drive or a penny pincher hoping to pocket a new device for free inserts the “ found ” drive into his or her computer ’ s USB port. Then the trouble begins. There are three main types of attack: Malicious code — In the most basic of USB drop attacks, the user clicks on one of the files on the drive. This unleashes a malicious code that automatically activates upon viewing and can download further malware from the Internet.
