The Agricultural Chemical User's Manual plays an important role in the efficient and economic production of wholesome food and fibrous products, reducing soil erosion and maintaining human health and lifestyles for an ever increasing world population. Agricultural chemicals are also known as pesticides and include herbicides, insecticides and fungicides. Chemical use is the key to ensuring that agricultural chemicals are beneficial to the community as a whole, and not just beneficial to users only. The community must have confidence that human health and the environment are protected when agricultural chemicals are used. The manual is a tool for anyone involved in pest or weed control activities by providing users with sound scientific advice on a range of subjects including basic pest and weed identification, effective pest and weed control strategies, appropriate application technology as well as ways to reduce the impacts of agricultural chemical spray drift.

The past decade has seen a rapid increase in the application of electrophysiologic measurement techniques in evaluating patients with hearing and balance disorders. Advances in computer technology have generated new and exciting applications in the areas of electrocochleography, electroneuronography, electronystagmography, and the auditory brainstem response. This book examines these recent developments and explores new areas of the field currently under investigation. An important issue in electrocochleography today is the widened AP-SP complex. Contributors to this book evaluate its significance in patients with cerebellopontine angle tumor. The many applications of the auditory brainstem response are surveyed, as well as the current status of the mid- and long-latency evoked responses. An overview of the relatively new area of otoacoustic emissions and its clinical applications is also included. Practicing otolaryngologists, otolaryngology residents, audiologists, audiology students, and auditory and vestibular scientists will benefit most from this well-researched book.
